DUNS: 118401549

CAGE: 97CP5

Primary NAICS Code:

611430 – Professional and Mgmt Development Training

Secondary NAICS Codes:

611420 – Computer Training

541511 – Custom Computer Programming Services

541512 – Computer Systems Design Services

541519 – Other Computer Related Services

541611 – Administrative Mgmt & General Mgmt Consulting Services

541990 – All Other Professional, Scientific, and Technical Services

- Veteran Owned Small Business

- NICCS (National Initiative for Cybersecurity Careers & Studies) Cybersecurity Training Provider

About us…

Industrial Automation & Cybersecurity For America Foundation (IACFAF) is a veteran owned small business that was established in 2019. The purpose of the Foundation is to provide job skills training in Cybersecurity and Industrial Automation to professionals, active military personnel, veterans, the underemployed, and underserved which will contribute to developing a workforce having the necessary skills required to fill all of the critical jobs in these areas. In addition, the foundation provides consulting services in cybersecurity, industrial automation, architectures, infrastructures, networks, and IT training.

Core Competencies

- Cybersecurity Certification Training (CISSP, CEH, Security +…)
- Cybersecurity Risk Analysis and Loss Prevention
- Security Awareness Training
- Cybersecurity & IT Training Programs (Curriculum Development & Instruction)
- Cybersecurity & IT Change Management
- Architectures, Infrastructure, Networks
- Online Learning Curriculum Development
- Industrial Automation and Systems Security assessment

Differentiators

- IACFAF has a talented and experienced staff of employees who are experts in designing, developing, implementing and supporting both Instructor-led and online learning programs for the preparation and training for nationally recognized information technology certifications.
- IACFAF has proven experience in not only delivering and supporting training programs but also developing texts and course supplements as well. A few examples: Information Assurance and Auditing, Cybersecurity Certification Preparation supplements, and Microsoft Windows Server configuration.
- Many of IACFAF's employees have led or been key points of contact for various government contract projects within Cybersecurity and Information Technology and have been Instructors at the University level in these areas.
- IACFAF's courses are the highest quality and provides more supplements (and online access) than what you will receive in other competitors' training courses.

Past Project Examples

- **IL Teamsters/Employers Apprenticeship Training Fund** – Developed IL Teamsters Online CDL Safety, Permit, and Endorsement Study Program
- **Chief Architect for Systems Planning (Major US Government Agency)** – This role included architectures, security planning, cost, migration, and release management.
- **US Marine Corps** – Developed classroom training material for the implementation of an integrated development environment that incorporated training for MS Server, SharePoint, and Siemens Teamcenter collaboration product suite.
- **Network Infrastructure Services Agency (Pentagon)** – Developed numerous tutorials for technicians and senior leaders in the organization (networking, security, firewalls, defense-in-depth, network forensics, and data communications training material.
